Advanced Transforms

Move on a Single Axis

You can Rotate and Scale on a single axis like this too, by pressing R or S instead of G.

Move on all but the Z Axis

You can Rotate and Scale on all but a single axis like this too, by pressing R or S instead of G. You can also select any other axis by pressing X or Y instead of Z.

Move on Local X Axis

You can Move on any local axis you need by pressing Y or Z twice instead of X. You can also do this with the Rotate and Scale commands, by pressing R or S instead of G.

Move on the local X and Y Axes

You can Move on all local axes but one by pressing Shift and X, Y or Z twice. You can also do this with the Rotate and Scale commands, by pressing R or S instead of G.

Add-on Shortcuts

Add Texture Nodes
